Retro-Pop Fashion III — Final Edition
Press Summary

When artificial intelligence dreams in color, fashion comes alive.

Retro-Pop Fashion III — Final Edition is a digital art collection marking the closure of a creative cycle dedicated to retro-pop aesthetics, neon light, and cinematic fashion imagery.
This final edition deliberately rejects accumulation and repetition in favor of clarity and intention.
 Each work is conceived as a standalone, iconic image while contributing to a coherent and restrained visual narrative.
The collection explores the boundary between fashion photography, nocturnal cinema, and retro-futuristic imagination. Artificial lighting, suspended poses, and electric silence define a universe where movement is suggested rather than imposed.

Hero Piece — Neon Highway
The central work of the collection, Neon Highway, establishes the narrative axis of the edition.
A solitary figure stands motionless before a luminous landscape suspended in time — a frozen moment between departure and stillness, presence and absence.

Edition: 1/1
Format: Portrait video
Blockchain: Polygon
Marketplace: OpenSea
Status: Available
This piece defines the scale, rhythm, and artistic intention of the entire collection.

About the Edition
- Final edition — no reissue
- All works are unique (1/1)
- Progressive release
- Digital art / NFT collection

The collection is intentionally revealed over time to preserve the readability of each work and the coherence of the project.

Artist
Jessica AI
 Digital artist working at the intersection of fashion imagery, cinematic aesthetics, and artificial intelligence.
